 - Only Neart na Gaoithe is Visible
 - Neart na Gaoithe and One Other Wind Farm are Visible
 - Neart na Gaoithe and Both Other Wind Farms are Visible

Note
 The CZTV is calculated to turbine tip height from a viewing height of 2m above ground level. The ZTV outputs for all windfarms are based on SNH guidance (Visual Representation of Windfarms, SNH, 2017). The terrain model assumes bare ground and is derived from OS Terrain 50 height data (obtained from Ordnance Survey in July 2017). The sea has been levelled out to 0m using MHW. Earth curvature and atmospheric refraction have been taken into account. The ZTV was calculated using ArcMap 10.4.1.
